SUMMARY

I am dynamic and motivated computer science student pursuing Full-Stack Development. I have knowledge of HTML, CSS, JavaScript, Java, PHP, MySQL. I am enrolled in a 3 months of Full-Stack Development program at AU-Ignite Future Skills, which helps me to deepen my coding skills in MERN stack, and other languages like PostgreSQL, Bootstrap, UI/UX Design. I am focused on learning new technologies like Next.js and multiple AWS services as I grow in my career and get better with my skill set.

PROJECTS

Personal Portfolio Website

- Made Front-End of Portfolio Website. Website contains fixed navbar, Home page, Education page, Resume download link and Contact page.
- Max-width and Media screen CSS properties are used for responsiveness.
- Technologies used : HTML, CSS, JS, Boxicons.

E-Commerce Website

- Made both Front-End and Back-End of an e-commerce website. Website contains login registration page, login page, adding products to cart page and home page in which you can see all the products.
- Technologies used: HTML, CSS, JS, PHP, MySQL.
- Server used : Apache Server
